MM3883, CR3883, R583CP, Information, Technology, Infrastructure, Extranet, Access, Process, Form, MDCN, 270, HIPAA, 270/271, Transactions, MEIC, Resellers, Eligibility, Inquiries

Provider Types Affected

All physicians, providers, and suppliers billing Medicare

Key Points

- The effective date of the instruction is May 20, 2005.
- The implementation date is August 22, 2005.
- The Centers for Medicare & Medicaid Services (CMS) is making changes to its Information Technology (IT) infrastructure to address standards for Medicare beneficiary eligibility inquiries.
- The necessary database and infrastructure will be created to provide a system for centralized Health Insurance Portability and Accountability Act (HIPAA) compliant 270/271 beneficiary health care eligibility inquiry and response in real-time.
- In June 2005, only clearinghouses, certain providers, and trading partners will be permitted to send 270 transactions via the extranet.
- The extranet is a secure, closed, and private network used to transmit data between Medicare carriers and intermediaries, and CMS.
- A provider that prefers to obtain eligibility data in an electronic data interchange (EDI) format, but does not want to use the 270/271 Version 4010, may contract with a clearinghouse to translate the information on its behalf.
- The process for clearinghouses and providers to obtain access to the Medicare Data Communications Network (MDCN) via the extranet is as follows:
 - The 270/271 Access Form should be completed in full and submitted electronically.
 - This form can be found at <http://www.cms.hhs.gov/it> on the CMS web site.

- The electronic submitted form will be directed to both CMS staff and the CMS' Medicare Eligibility Integration Contractor (MEIC).
- The CMS staff will ensure all the necessary information is provided on the form as well as ensure the complete connectivity to the 270/271 application.
- The MEIC will:
 - Contact the clearinghouses, providers, and trading partners to authenticate the accessing entity's identity;
 - Provide the clearinghouses, providers, and trading partners with a submitter ID that is required to be used on all 270/271 transactions, once authentication has been completed; and
 - Coordinate the testing.
- After successful testing, 270 production inquiries may be sent real-time.
- An entity must obtain the necessary telecommunication software from the AT&T reseller on its own to access the MDCN. The current AT&T resellers are:
 - IVANS: <http://www.ivans.com>
 - McKesson: <http://www.mckesson.com>
