

Registration for Panel Presentations - Sept 26th and 27th, 2005 PAOC meeting

Over the course of the 2 day meeting, the PAOC will be hosting a series of stakeholder panels designed to give manufacturers/suppliers (or their representatives) an opportunity to present unique issues associated with their product category as they pertain to competitive bidding for suppliers of medical devices or supplies. CMS has sent letters to relevant industry associations requesting nominations for these panels. We are encouraging individual manufacturers/suppliers to work with their respective associations in developing these nominations. In addition, individuals other than national associations may send in nominations.

All nominations must be received by 8/31/05 and include the following information: name of the person recommended and their organization, the panel the person will represent, the reason for the recommendation, and contact information for the person recommended.

All nominations should be sent to Sean Dalenberg at sean.dalenberg@cms.hhs.gov.
