

News Flash - Effective January 1, 2008, National Provider Identifiers (NPIs) will be required to identify the primary providers (the Billing and Pay-to Providers) in Medicare electronic and paper institutional claims (i.e. 837I and UB-04 claims). You may continue to use the legacy identifier in these fields as long as you also use the NPI in these fields. This means that 837I and UB-04 claims with ONLY legacy identifiers in the Billing and Pay-to Provider fields will be rejected starting on January 1, 2008. (Pay-to Provider is identified only if it is different from the Billing Provider.) You may continue to use only legacy identifiers for the secondary provider fields in the 837I and UB-04 claims until May 23, 2008, if you choose.

MLN Matters Number: MM5726

Related Change Request (CR) #: 5726

Related CR Release Date: November 2, 2007

Effective Date: May 23, 2008

Related CR Transmittal #: R302OTN

Implementation Dates: January 7, 2008 and April 7, 2008

Rejection of Electronic Claim Status Requests that Lack National Provider Identifiers (NPIs)

Provider Types Affected

Physicians, providers, and suppliers who submit claims status requests using the electronic data interchange (EDI) standard Health Insurance Portability and Accountability Act (HIPAA) transactions to Medicare contractors (carriers, Fiscal Intermediaries, (FIs), including Regional Home Health Intermediaries (RHHIs), Medicare Administrative Contractors (MACs), and DME Medicare Administrative Contractors (DME MACs))

Provider Action Needed

STOP – Impact to You

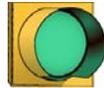

This article is based on CR5726, which describes policy changes that are a result of HIPAA requirements that prohibit the acceptance of EDI transactions that contain legacy provider numbers. CR5726 specifically address changes around the processing of electronic claim status requests and the responses to such requests.

**CAUTION – What You Need to Know**

Beginning May 23, 2008, Medicare will return to sender any electronic claim status request (X12 276 transactions) that contain legacy provider numbers instead of or in addition to the NPI number. This policy also applies to direct data entry (DDE) claim status inquiries and to Internet claim status screens operated as demonstration projects by some contractors.

**GO – What You Need to Do**

No later than May 23, 2008, providers should ensure that all electronic claim status requests sent to Medicare contractors contain only NPI numbers (no legacy provider numbers.)

Background

All electronics claim status requests submitted using the EDI standards (X12 276) adopted under HIPAA for national use must use the HIPAA-mandated NPI exclusively for provider identification no later than May 23, 2008. Those that do not are to be returned to the sender beginning May 23, 2008. All claims status responses (X12 277 transactions) will also contain only NPIs as of May 23, 2008. The same policy applies to direct data entry claim status inquiries and to those Internet claim status screens some contractors are permitted to operate under an Internet demonstration program. The absence of an NPI or the presence of a legacy number as of May 23, 2008, will result in rejection of the inquiry by these direct data entry processes.

Providers are advised that Medicare will return an NPI on the claims status response on or after May 23, 2008, even if the claim status request is received prior to May 23, 2008, using a legacy number. In returning the NPI, Medicare will use a crosswalk file that relates the legacy number to the provider's NPI. If the legacy number maps to more than one NPI, Medicare will return the first active NPI in the 277 response.

To avoid confusion, Medicare encourages providers to begin including their NPIs in their X12 276 inquiries as soon as possible prior to May 23, 2008, particularly if the provider has more than one NPI, but was assigned only one legacy number by Medicare for claims submission purposes.
