

September 27 is World Heart Day. The Centers for Medicare & Medicaid Services (CMS) is asking the provider community to keep their patients with Medicare healthy by encouraging them to take advantage of Medicare-covered preventive services.

Medicare provides coverage for cardiovascular screening blood tests, ultrasound screening for abdominal aortic aneurysms (AAA), and smoking and tobacco-use cessation counseling for qualified beneficiaries.

What Can You Do?

As a health care professional who provides care to seniors and others with Medicare, you can help protect the health of your Medicare patients by educating them about their risk factors and reminding them of the importance of Medicare-covered preventive services that are appropriate for them.

For More Information

CMS has developed several educational products related to Medicare-covered preventive services:

- The Guide to Medicare Preventive Services for Physicians, Providers, Suppliers, and Other Health Care Professionals ~ this newly revised comprehensive resource provides coverage and coding information on the array of preventive services and screenings that Medicare covers, including cardiovascular screening blood tests, AAA screenings, and smoking and tobacco-use cessation counseling.
