

Ease of Integration with Other Applications

Application Integration

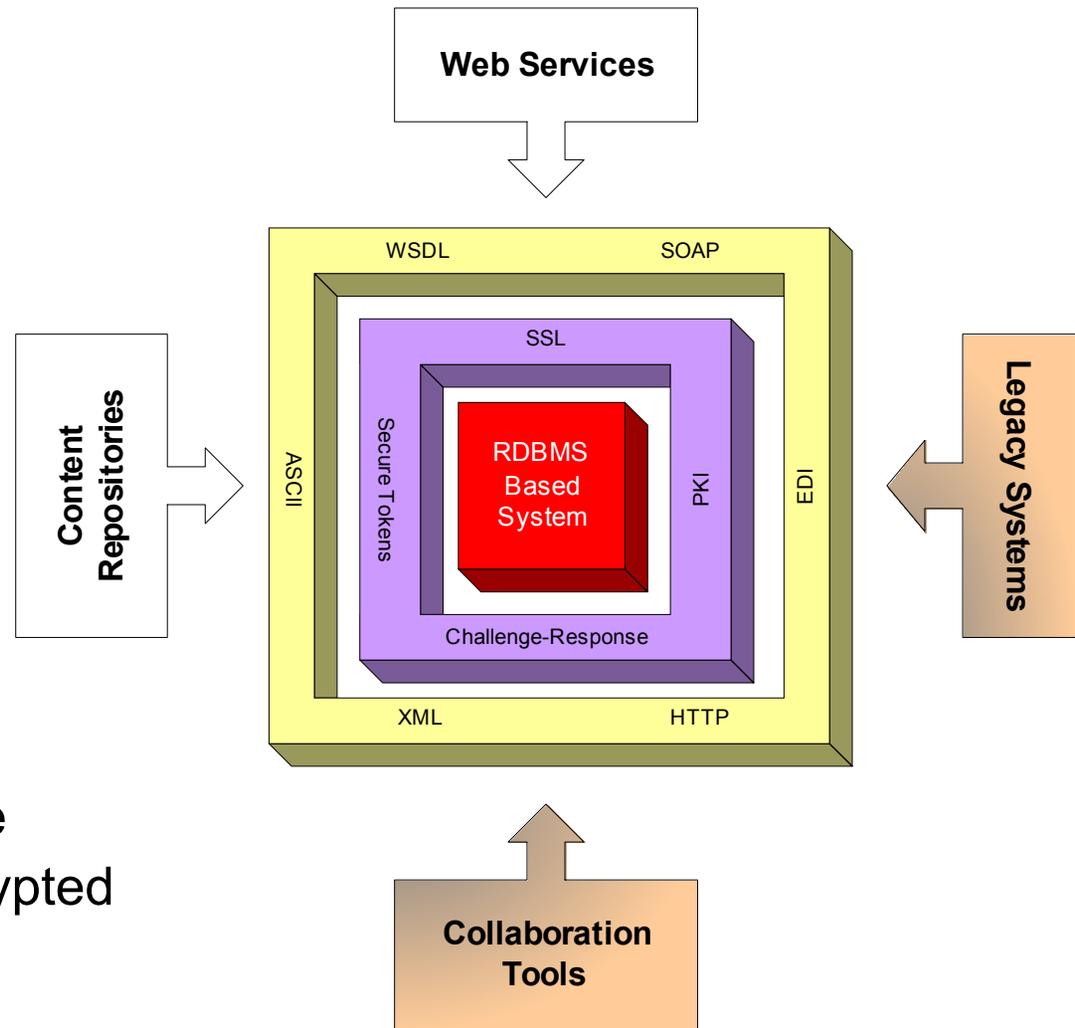

Open standards interface development encourages integration with your additional applications, including:

- Case Management
- Enrollment Management
- Prior Authorization
- Disease Management
- Enterprise Applications

Ease of Integration

- *Conforms to Open Standards*
 - SOAP / WSDL
 - XML
 - HTTP
 - EDI
 - ASCII Conversion
- *Security*
 - SSL (HTTPS)
 - PKI
 - Challenge-Response
 - Secure tokens (encrypted XML)

**Ability to Access Data In Real-
Time**

Data Capture, Availability, Access, and Currency

- All data is captured immediately as it is entered into the system (electronic, data entry, image, etc.)
- Once captured, data is available for on-line, real-time access
- Access is through the query capabilities of RDBMS components for authorized users
- All data is current

RDBMS architecture provides ready data access to support business functions:

- **Financial Planning**
- **Health Systems Planning**
- **Medical Resource Management**
- **Clinical Management**
- **Clinical Research**
- **Contract Administration**

- Mirrored image of primary database, data replicated synchronously with the relational database
- Data immediately available for query access
- Access is through the query, analysis, and reporting capabilities of the integrated COTS toolset and browser interface
- All data is current, and serves as immediate backup for the primary database
