EXPANDED MODIFIED MEDPAR FILE

UPDATED MARCH 2011

CONTENTS

EXPANDED MODIFIED MEDPAR FILE

The Medicare Provider Analysis and Review (MEDPAR) file contains records for 100 percent of Medicare beneficiaries using hospital inpatient services. The records are stripped of most data elements that will permit identification of beneficiaries. The hospital is identified by the six-position Medicare bill number. The file is available to persons qualifying under the terms of the routine use act as outlined in the December 24, 1984, Federal Register, and amended by the DECEMBER 2, 1985 notice.

SIGNED DATA RELEASE AGREEMENT REQUIRED. FOR ALL FILES REQUIRING A SIGNED DATA RELEASE AGREEMENT, PLEASE WRITE OR CALL TO OBTAIN A BLANK AGREEMENT FORM BEFORE PLACING ORDER.

Two versions of this file are created each year.

1. Notice of Proposed Ruling (NPRM) published in the Federal Register, usually available by the end of April. This file is derived from the MEDPAR file with a cutoff of three months after the end of the fiscal year (December file).
2. Final Rule published in the Federal Register, usually available by the first week of August. This file is derived from the MEDPAR file with a cutoff of six months after the end of the fiscal year (March file).

The file specifications for the Expanded Modified MEDPAR File are as follows:

64 DIAGNOSIS CODE

Description:

This field specifies the principal and other diagnosis codes that are obtained from the patient's discharge bill. Principal diagnosis is defined as the condition established, after study, that is chiefly responsible for admission of the patient. The principal diagnosis is reported first, followed by up to eight additional diagnoses. The order of these eight is at the discretion of the provider.

Coding Scheme:

Coding is based on International Classification of Diseases 9th Revision, Clinical Modification (ICD-9-CM). Providers key the ICD-9-CM code from the bills and report the information to HCFA as part of the claims tape record. Each code can be up to five characters, left justified.

70 BLOOD FURNISHED

Description:

This field specifies the total number of pints of whole blood or units of packed red cells furnished, regardless of whether they were replaced. Blood is reported in complete units rounded upwards. This entry serves as the basis for counting pints toward the blood deductible and must, therefore, include both replaced and unreplaced blood.

Coding Scheme:

Three-position field nn, where n is a number

Original Source:

Uniform Bill, Form HCFA-1450

Limitations:

Based on an analysis of aggregated records, there appears to be a misinterpretation by some providers of the format (i.e., the field is to contain whole units, but it appears, in some cases, to be reported with tenths of units).

72 DRG Version 27

Description:

Each DRG represents broad clinical categories that are based on body system involvement and disease etiology. Each category is similar in its use of diagnostic resources and is identified using specific guidelines. Each category must have been clinically consistent, had a sufficient number of patients, and covered the complete range of diagnoses represented in the ICD-9-CM, without overlap. The categories were developed by a Yale University research team and revised by Health Services International, Inc.

* Please note: For the purposes of IPPS regulation development, the Present on Admission (POA) indicator was not considered in the grouping process. The groupings in this file reflect the DRG into which the case is categorized without incorporating any POA indicators.

Coding Scheme:

Three-position field nnn, where n is a number

Original Source:

Added to the record by the intermediary's GROUPER software, which translates variables such as age, sex, diagnosis and surgical codes into the single applicable DRG.

Step 1 Compute Age-of-Person

Step 2 If Age > 64, enter 10 at Medicare Status Code and go to Step 4.

Step 3 Generate a Medicare Status Code using the original reason for entitlement code (OREC) and the current reason for entitlement code (CREC) and the following table:

OREC	&	CREC	=	MS CODE	OREC	&	CREC	=	MS CODE
0	&	0	=	10	1	&	0	=	20

S = Psychiatric unit (excluded from PPS)
T = Rehabilitation unit (excluded from PPS)
U = Short term/acute care swing-bed hospital
V = Alcohol drug unit (prior to 10/87 only)
W = Long term SNF swing-bed hospital (eff 3/91)
Y = Rehab hospital swing-bed (eff 9/92)
Z = Swing Bed Designation for Critical Access Hospitals

There is also a special numbering system for assigning emergency hospital identification numbers (non participating hospitals). The sixth position of the provider number is as follows:

E = Non-federal emergency hospital
F = Federal emergency hospital
