Subject: Update to the Place of Service (POS) Code Set to Add a Code for Prison/Correctional Facility

I. SUMMARY OF CHANGES: Adds a new Place of Service code for prison/correctional facility to the Place of Service Code Set and makes the necessary systems changes to accommodate it. In addition, this CR makes minor formatting changes to the code set as presented in the Claims Processing manual to ease readability and comprehension of code effective dates. Note: VMS will be making the necessary systems changes during a later release, under a separate CR.

New / Revised Material

Effective Date: July 1, 2006

Implementation Date: January 2, 2007

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

SUBJECT: Update to the Place of Service (POS) Code Set to Add a Code for Prison/Correctional Facility

I. GENERAL INFORMATION

A. Background: As an entity covered under the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Medicare must comply with standards and their implementation guides adopted by regulation under this statute. The currently adopted professional implementation guide for the ASC X12N 837 standard requires that each electronic claim transaction include a Place of Service (POS) code from the POS code set maintained by the Centers for Medicare and Medicaid Services (CMS). As a payer, Medicare must be able to recognize as valid any valid code from the POS code set that appears on the HIPAA standard claim transaction.

The POS code set provides setting information necessary to appropriately pay Medicare and Medicaid claims. At times, Medicaid has had a greater need for specificity than has Medicare, and many of the new codes developed over the past few years have been to meet Medicaid's needs. While Medicare does not always need this greater specificity in order to appropriately pay claims, it nevertheless adjudicates claims with the new codes to ease coordination of benefits and to give Medicaid and other payers the setting information they require. This CR will update the current POS code set to add a new code for prison/correctional facility and will implement the systems and carrier-level changes needed for Medicare to adjudicate claims with the new code.

This update will add a POS code "09" for a prison/correctional facility setting. Carriers shall develop policies as needed to adjudicate claims containing this new code.

Note: VMS and DMERC/DME MACs will implement this code during a later release under a separate CR.

B. Policy: Unless prohibited by national policy to the contrary, Medicare not only recognizes valid POS codes from the POS code set but also adjudicates claims having these codes. Although the Medicare program does not always have the same need for setting specificity as other payers, including Medicaid, adjudicating the claims eases the coordination of benefits for Medicaid and other payers who may need the specificity afforded by the entire POS code set.

Claims for covered services rendered in this setting, if payable by Medicare, shall be paid at the nonfacility rate.

Carriers must continue to comply with CMS current policy that does not allow payment for Medicare services in a penal institution in most cases. The addition of a POS code for a prison/correctional facility setting does not supersede this policy. (See Pub. 100-4, Medicare Claims Processing, Section 10.4, Chapter 1.)

10.5 - Place of Service Codes (POS) and Definitions

(Rev. 1049, Issued: 09-01-06, Effective: 07-01-06, Implementation: 01-02-07)

- HIPAA
 - The Health Insurance Portability and Accountability Act of 1996 (HIPAA) became effective October 16, 2003, for all covered entities. Medicare is a covered entity under HIPAA.
 - The final rule, “Health Insurance Reform: Standards for Electronic Transactions,” published in the **Federal Register**, August 17, 2000, adopts the standards to be used under HIPAA and names the implementation guides to be used for these standards. The ASC X12N 837 professional is the standard to be used for transmitting health care claims electronically, and its implementation guide requires the use of POS codes from the National POS code set, currently maintained by CMS.
 - As a covered entity, Medicare must use the POS codes from the National POS code set for processing its electronically submitted claims. Medicare must also recognize as valid POS codes from the POS code set when these codes appear on such a claim.
 - Medicare must recognize and accept POS codes from the National POS code set in terms of HIPAA compliance. Note special considerations for Homeless Shelter (code 04) as well as Indian Health Service (codes 05, 06) and Tribal 638 (codes 07, 08) settings, described below. Where there is no national policy for a given POS code, carriers may work with their carrier medical directors to develop local policy regarding the services payable in a given setting, and this could include creating a crosswalk to an existing setting if desired. However, carriers must pay for the services at either the facility or the nonfacility rate as designated below. In addition, carriers, when developing policy, must ensure that they continue to pay appropriate rates for services rendered in the new setting; if they choose to create a crosswalk from one setting to another, they must crosswalk a facility rate designated code to another facility rate designated code, and a nonfacility rate designated code to another nonfacility rate designated code. For previously issued POS codes for which a crosswalk was mandated, and for which no other national Medicare directive has been issued, carriers may elect to continue to use the crosswalk or develop local policy regarding the services payable in the setting, including another crosswalk, if appropriate. If a carrier develops local policy for these settings, but later receives specific national instructions for these codes, the carriers shall defer to and comply with the newer instructions. (**Note:** While, effective January 1, 2003, codes 03 School, 04 Homeless Shelter, and 20 Urgent Care became part of the National POS code set and were to be crosswalked to 11 Office, this mandate to crosswalk has since been lifted, as indicated above).
- The National POS Code Set and Instructions for Using It

The following is the current National POS code set, with facility and non-facility designations noted for Medicare payment for services on the Physician Fee Schedule, *as of July 1, 2006. This code set has changed to include a new code, 09, for a prison/correctional facility setting, effective July 1, 2006.*

Note: The addition of code 09 to the POS code set and Medicare claims processing reflects Medicare's compliance with HIPAA laws and regulations. Carriers must continue to comply with CMS current policy that does not allow payment for Medicare services in a penal institution in most cases. The addition of a POS code for a prison/correctional facility setting does not supersede this policy. (See Pub. 100-4, Medicare Claims Processing, Section 10.4, Chapter 1.)

The code set is annotated with the effective dates for this and all other codes added on and after January 1, 2003. Codes without effective dates annotated are long-standing and in effect on and before January 1, 2003.

<p>71 State or Local Public Health Clinic</p> <p>A facility maintained by either State or local health departments that provides ambulatory primary medical care under the general direction of a physician.</p>	NF

72 Rural Health Clinic	NF
A certified facility which is located in a rural medically underserved area that provides ambulatory primary medical care under the general direction of a physician.	
73-80 Unassigned	
81 Independent Laboratory	NF
A laboratory certified to perform diagnostic and/or clinical tests independent of an institution or a physician's office.	
82-98 Unassigned	
99 Other Place of Service	NF
Other place of service not identified above.	

- **Special Considerations for Homeless Shelter (Code 04)**

Note that for the purposes of receiving durable medical equipment (DME), a homeless shelter is considered the beneficiary's home. Because DME is payable in the beneficiary's home, the crosswalk for Homeless Shelter (code 04) to Office (code 11) that was mandated effective January 1, 2003, may need to be adjusted or local policy developed so that HCPCS codes for DME are covered when other conditions are met and the beneficiary is in a homeless shelter. If desired, carriers are permitted to work with their carrier medical directors to determine a new crosswalk such as from Homeless Shelter (code 04) to Home (code 12) or Custodial Care Facility (code 33) for DME provided in a homeless shelter setting. If a carrier is currently paying claims correctly, however, it is not necessary to change the current crosswalk.

- **Special Considerations for Indian Health Service (Codes 05, 06) and Tribal 638 Settings (Codes 07, 08)**

Medicare does not currently use the POS codes designated for these settings. Follow the instructions you have received regarding how to process claims for services rendered in IHS and Tribal 638 settings. If you receive claims with these codes, you must initially accept them in terms of HIPAA compliance. However, follow your "return as unprocessable" procedures after this initial compliance check. Follow your "return as unprocessable" procedures when you receive paper claims with these codes. (Note that while these codes became part of the National POS code set effective January 1, 2003, Medicare contractors received instructions regarding how to process claims with these codes effective October 1, 2003, so that Medicare could be HIPAA compliant by October 16, 2003).

- **Special Considerations for Mobile Unit Settings (Code 15)**

When services are furnished in a mobile unit, they are often provided to serve an entity for which another POS code exists. For example, a mobile unit may be sent to a physician's office or a skilled nursing facility. If the mobile unit is serving an entity for which another POS code already exists, providers should use the POS code for that entity. However, if the mobile unit is not serving an entity which could be described by an existing POS code, the providers are to use the Mobile Unit POS code 15. Apply the nonfacility rate to payments for services designated as being furnished in POS code 15; apply the appropriate facility or nonfacility rate for the POS code designated when a code other than the mobile unit code is indicated.

- **Paper Claims**

Adjudicate paper claims with codes from the National POS code set as you would for electronic claims. (Prior to HIPAA implementation, Medicare contractors were instructed to also apply these requirements to non-standard formats, effective January 1, 2003. However, it is not the purpose of instructions for this code set to determine how non-standard formats are to be handled in a HIPAA environment, and this information should be expected from other instructions.)
