

CMS Manual System	Department of Health & Human Services
Pub 100-04 Medicare Claims Processing	Centers for Medicare & Medicaid Services
Transmittal 1678	Date: FEBRUARY 13, 2009
	Change Request 6321

SUBJECT: Outpatient Therapy Caps With Exceptions in CY 2009

I. SUMMARY OF CHANGES: This change request describes the policy for outpatient therapy cap exceptions for 2009. The dollar amount of therapy caps is updated.

NEW/REVISED MATERIAL

EFFECTIVE DATE: JANUARY 1, 2009

IMPLEMENTATION DATE: APRIL 6, 2009

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

II. CHANGES IN MANUAL INSTRUCTIONS: (N/A if manual is not updated)

R=REVISED, N=NEW, D=DELETED

R/N/D	CHAPTER / SECTION / SUBSECTION / TITLE
R	5/10.2/The Financial Limitation
R	5/20/HCPCS Coding Requirement

III. FUNDING:

SECTION A: For Fiscal Intermediaries and Carriers:

No additional funding will be provided by CMS; contractor activities are to be carried out within their operating budgets.

SECTION B: For Medicare Administrative Contractors (MACs):

The Medicare administrative contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the contracting officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the contracting officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

Pub. 100-04	Transmittal: 1678	Date: February 13, 2009	Change Request: 6321
-------------	-------------------	-------------------------	----------------------

SUBJECT: Outpatient Therapy Caps With Exceptions in CY 2009

Effective Date: January 1, 2009

Implementation Date: April 6, 2009

I. GENERAL INFORMATION

A. Background: The Tax Relief and Health Care Act of 2006 established limits on outpatient therapy services. These limits change annually. Medicare Improvements for Patients and Providers Act of 2008 extended the exceptions process for therapy caps through CY2009.

B. Policy: Therapy caps for 2009 will be \$1840. The exceptions process will continue unchanged through CY 2009.

II. BUSINESS REQUIREMENTS TABLE

Use "Shall" to denote a mandatory requirement

Number	Requirement	Responsibility (place an "X" in each applicable column)									
		A / B M A C	D M E M A C	F I	C A R R I E R	R H I	Shared-System Maintainers				OTHER
							F I S S	M C S	V M S	C W F	
6321.1	Medicare contractors shall make providers aware of the clarifications provided in the updated manual sections attached to this instruction.	X		X	X		X	X			
6321.2	Within 3 days of receipt of this change request, contractors shall update the Medicare Summary Alert 38.18, notice to language, stated in the manual instructions.	X		X	X		X	X			
6321.3	CWF shall update the 2009 allowed dollar amount for outpatient therapy limits, except outpatient hospital services, to \$1840 for physical therapy and speech-language pathology combined and \$1840 for occupational therapy separately.										X
6321.4	Contractors shall pay for covered (medically necessary) services that exceed outpatient therapy caps	X		X	X						
6321.5	Medicare contractors shall be aware that CPT 0029T has been removed from the 2009 therapy code list.	X		X	X						
6321.6	Medicare contractors shall change any policies or local edits that are affected by the removal of CPT 0029T.	X		X	X						
6321.7	Contractors need not search their files to either retract payment for claims already paid or to retroactively pay claims. However, contractors shall adjust claims brought to their attention.	X		X	X						

III. PROVIDER EDUCATION TABLE

Number	Requirement	Responsibility (place an "X" in each applicable column)									
		A / B M A C	D M E M A C	F I	C A R R I E R	R H I	Shared-System Maintainers				OTHER
							F I S S	M C S	V M S	C W F	
6321.8	<p>Option 2: A provider education article related to this instruction will be available at http://www.cms.hhs.gov/MLNMattersArticles/ shortly after the CR is released. You will receive notification of the article release via the established "MLN Matters" listserv.</p> <p>Contractors shall post this article, or a direct link to this article, on their Web site and include information about it in a listserv message within one week of the availability of the provider education article. In addition, the provider education article shall be included in your next regularly scheduled bulletin. Contractors are free to supplement MLN Matters articles with localized information that would benefit their provider community in billing and administering the Medicare program correctly.</p>	X		X	X						

IV. SUPPORTING INFORMATION

Section A: For any recommendations and supporting information associated with listed requirements, use the box below:

Use "Should" to denote a recommendation.

X-Ref Requirement Number	Recommendations or other supporting information:
6321.7	Only outpatient therapy claims without KX modifiers that exceed the 2008 dollar amount of \$1810 per cap will be rejected between January 1, 2009 and implementation of the new cap amount. If these claims represent necessary services, they should be resubmitted with KX modifiers. Claims with KX modifiers shall circumvent the cap rejection in CWF.

Section B: For all other recommendations and supporting information, use this space:

V. CONTACTS

Pre-Implementation Contact(s): Dorothy Shannon 410-786-3396

Post-Implementation Contact(s): The Medicare contractor who pays the claim

VI. FUNDING

Section A: For *Fiscal Intermediaries (FIs), Carriers, and Regional Home Health Intermediaries (RHHIs)*:
No additional funding will be provided by CMS; contractor activities are to be carried out within their operating budgets.

Section B: For *Medicare Administrative Contractors (MACs)*:

The Medicare administrative contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the contracting officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the contracting officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

10.2 - The Financial Limitation

(Rev. 1678; Issued: 02-13-09; Effective Date: 01-01-09; Implementation Date: 04-06-09)

A. Financial Limitation Prior to the Balanced Budget Refinement Act (BBRA)

Section 4541(a)(2) of the Balanced Budget Act (BBA) (P.L. 105-33) of 1997, which added [§1834\(k\)\(5\)](#) to the Act, required payment under a prospective payment system for outpatient rehabilitation services (except those furnished by or under arrangements with a hospital). Outpatient rehabilitation services include the following services:

- Physical therapy (which includes outpatient speech-language pathology); and
- Occupational therapy.

Section 4541(c) of the BBA required application of a financial limitation to all outpatient rehabilitation services (except those furnished by or under arrangements with a hospital). In 1999, an annual per beneficiary limit of \$1,500 applied to all outpatient physical therapy services (including speech-language pathology services). A separate limit applied to all occupational therapy services. The limit is based on incurred expenses and includes applicable deductible and coinsurance. The BBA provided that the limits be indexed by the Medicare Economic Index (MEI) each year beginning in 2002.

The limitation is based on therapy services the Medicare beneficiary receives, not the type of practitioner who provides the service. Physical therapists, speech-language pathologists, occupational therapists as well as physicians and certain nonphysician practitioners could render a therapy service.

As a transitional measure, effective in 1999, providers/suppliers were instructed to keep track of the allowed incurred expenses. This process was put in place to assure providers/suppliers did not bill Medicare for patients who exceeded the annual limitations for physical therapy, and for occupational therapy services rendered by individual providers/suppliers. In 2003 and later, the limitation was applied through CMS systems.

B. Moratoria and Exceptions for Therapy Claims

Section 221 of the BBRA of 1999 placed a 2-year moratorium on the application of the financial limitation for claims for therapy services with dates of service January 1, 2000, through December 31, 2001.

Section 421 of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act (BIPA) of 2000, extended the moratorium on application of the financial limitation to claims for outpatient rehabilitation services with dates of service January 1, 2002, through December 31, 2002. Therefore, the moratorium was for a 3-year period and applied to outpatient rehabilitation claims with dates of service January 1, 2000, through December 31, 2002.

In 2003, there was not a moratorium on therapy caps. Implementation was delayed until September 1, 2003. Therapy caps were in effect for services rendered on September 1, 2003 through December 7, 2003.

Congress re-enacted a moratorium on financial limitations on outpatient therapy services on December 8, 2003 that extended through December 31, 2005. Caps were implemented again on January 1, 2006 and policies were modified to allow exceptions as directed by the Deficit Reduction Act of 2005 only for calendar year 2006. The Tax Relief and Health Care Act of 2006 extended the cap exceptions process through calendar year 2007. The Medicare, Medicaid, and SCHIP Extension Act of 2007 extended the cap exceptions process for services furnished through June 30, 2008. The Medicare Improvements for Patients and Providers Act of 2008 extended the exceptions process from July 1, 2008 through December 31, 2009.

Future exceptions. The cap exception for therapy services billed by outpatient hospitals was part of the original legislation and applies as long as caps are in effect. Exceptions to caps based on the medical necessity of the service are in effect only when Congress legislates the exceptions, as *noted above*. References to the exceptions process in subsection C of this section apply only when the exceptions are in effect.

C. Application of Financial Limitations

Financial limitations on outpatient therapy services, as described above, began for therapy services rendered on or after on January 1, 2006. See C 1 to C 7 of this section when exceptions to therapy caps apply. The limits were \$1740 in 2006 and \$1780 in 2007, *\$1810 for 2008*. For 2009, the annual limit on the allowed amount for outpatient physical therapy and speech-language pathology combined is *\$1840*; the limit for occupational therapy is *\$1840*. Limits apply to outpatient Part B therapy services from all settings except outpatient hospital and hospital emergency room. These excluded hospital services are reported on types of bill 12x or 13x, *or 85x*.

Contractors apply the financial limitations to the Medicare Physician Fee Schedule (MPFS) amount (or the amount charged if it is smaller) for therapy services for each beneficiary.

As with any Medicare payment, beneficiaries pay the coinsurance (20 percent) and any deductible that may apply. Medicare will pay the remaining 80 percent of the limit after the deductible is met. These amounts will change each calendar year. Medicare Contractors shall publish the financial limitation amount in educational articles. It is also available at 1-800-Medicare.

Medicare shall apply these financial limitations in order, according to the dates when the claims were received. When limitations apply, the Common Working File (CWF) tracks the limits. Shared system maintainers are not responsible for tracking the dollar amounts of incurred expenses of rehabilitation services for each therapy limit.

In processing claims where Medicare is the secondary payer, the shared system takes the lowest secondary payment amount from MSPPAY and sends this amount on to CWF as the amount applied to therapy limits.

1. Exceptions to Therapy Caps - General

The Deficit Reduction Act of 2005 directed CMS to develop exceptions to therapy caps for calendar year 2006 and those exceptions have been extended several times by subsequent legislation. The following policies concerning *exceptions* to caps due to medical necessity apply only when the exceptions process is in effect. With the exception of the use of the KX modifier, the guidance in this section concerning medical necessity applies as well to services provided before caps are reached.

Instructions for contractors to manage automatic process for exceptions will be found in the Program Integrity Manual, chapter 3, section 3.4.1.2. Provider and supplier information concerning exceptions is in this manual and in IOM Pub. 100-02, chapter 15, section 220.3. Exceptions shall be identified by a modifier on the claim and supported by documentation.

Since the providers and suppliers will take an active role in obtaining an exception for a beneficiary, this manual section is written to address them as well as Medicare contractors.

The beneficiary may qualify for use of the cap exceptions at any time during the episode when documented medically necessary services exceed caps. All covered and medically necessary services qualify for exceptions to caps.

In 2006, the Exception Processes fell into two categories, Automatic Process Exceptions, and Manual Process Exceptions. Beginning January 1, 2007, there is no manual process for exceptions. All services that require exceptions to caps shall be processed using the automatic process. All requests for exception are in the form of a KX modifier added to claim lines. (See subsection C6 for use of the KX modifier.)

Use of the automatic process for exceptions increases the responsibility of the provider/supplier for determining and documenting that services are appropriate.

Also, use of the automatic process for exception does not exempt services from manual or other medical review processes as described in 100-08, Chapter 3, Section 3.4.1.1.1. Rather, atypical use of the automatic exception process may invite contractor scrutiny. Particular care should be taken to document improvement and avoid billing for services that do not meet the requirements for skilled services, or for services which are maintenance rather than rehabilitative treatment (See Pub. 100-02, chapter 15, sections 220.2, 220.3, and 230).

The KX modifier, described in subsection C6, is added to claim lines to indicate that the clinician attests that services are medically necessary and justification is documented in the medical record.

2. Automatic Process Exceptions

The term “automatic process exceptions” indicates that the claims processing for the exception is automatic, and not that the exception is automatic. An exception may be made when the patient’s condition is justified by documentation indicating that the beneficiary requires continued skilled therapy, i.e., therapy beyond the amount payable under the therapy cap, to achieve their prior functional status or maximum expected functional status within a reasonable amount of time.

No special documentation is submitted to the contractor for automatic process exceptions. The clinician is responsible for consulting guidance in the Medicare manuals and in the professional literature to determine if the beneficiary may qualify for the automatic process exception *because* documentation justifies medically necessary services above the caps. The clinician’s opinion is not binding on the Medicare contractor who makes the final determination concerning whether the claim is payable.

Documentation justifying the services shall be submitted in response to any Additional Documentation Request (ADR) for claims that are selected for medical review. Follow the documentation requirements in Pub. 100-02, chapter 15, section 220.3. If medical records are requested for review, clinicians may include, at their discretion, a summary that specifically addresses the justification for therapy cap exception.

In making a decision about whether to utilize the automatic process exception, clinicians shall consider, for example, whether services are appropriate to--

- The patient’s condition including the diagnosis, complexities and severity (A list of the excepted evaluation codes are in C.2.a. A list of the ICD-9 codes for conditions and complexities that might qualify a beneficiary for exception to caps is in 10.2 C3. The list is a guideline and neither assures that services on the list will be excepted nor limits provision of covered and medically necessary services for conditions not on the list);
- The services provided including their type, frequency and duration;
- The interaction of current active conditions and complexities that directly and significantly influence the treatment such that it causes services to exceed caps.

In addition, the following should be considered before using the automatic exception process:

a. Exceptions for Services

Evaluation. The CMS will except therapy evaluations from caps after the therapy caps are reached when evaluation is necessary, e.g., to determine if the current status of the beneficiary requires therapy services. For example, the following evaluation procedures may be appropriate:

92506, 92597, 92607, 92608, 92610, 92611, 92612, 92614, 92616, 96105, 97001, 97002, 97003, 97004.

These codes will continue to be reported as outpatient therapy procedures as described in the Claims Processing Manual, Chapter 5, Section 20(B) “Applicable Outpatient Rehabilitation HCPCS Codes.” They are not diagnostic tests. Definition of evaluations and documentation is found in Pub. 100-02, sections 220 and 230.

Other Services. There are a number of sources that suggest the amount of certain services that may be typical, either per service, per episode, per condition, or per discipline. For example, see *the CSC - Therapy Cap Report, 3/21/2008, and CSC – Therapy Edits Tables 4/14/2008* at www.cms.hhs.gov/TherapyServices (Studies and Reports). Professional literature and guidelines from professional associations also provide a basis on which to estimate whether the type, frequency and intensity of services are appropriate to an individual. Clinicians and contractors should utilize available evidence related to the patient’s condition to justify provision of medically necessary services to individual beneficiaries, especially when they exceed caps. Contractors shall not limit medically necessary services that are justified by scientific research applicable to the beneficiary. Neither contractors nor clinicians shall utilize professional literature and scientific reports to justify payment for continued services after an individual’s goals have been met earlier than is typical. Conversely, professional literature and scientific reports shall not be used as justification to deny payment to patients whose needs are greater than is typical or when the patient’s condition is not represented by the literature.

b. Exceptions for Conditions or Complexities Identified by ICD-9 codes.

Clinicians may utilize the automatic process for exception for any diagnosis for which they can justify services exceeding the cap. Based upon analysis of claims data, research and evidence based practice guidelines, CMS has identified conditions and complexities represented by ICD-9 codes that may be more likely than others to require therapy services that exceed therapy caps. This list appears in 10.2 C3. Clinicians may use the automatic process of exception for beneficiaries who do not have a condition or complexity on this list when they justify the provision of therapy services that exceed caps for that patient’s condition.

Not all patients who have a condition or complexity on the list are “automatically” excepted from therapy caps. See Pub. 100-02, chapter 15, section 230.3 for documenting the patient’s condition and complexities. Contractors may scrutinize claims from providers whose services exceed caps more frequently than is typical.

Regardless of the condition, the patient must also meet other requirements for coverage. For example, the patient must require skilled treatment for a covered, medically necessary service; the services must be appropriate in type, frequency and duration for the patient's condition and service must be documented appropriately. Guidelines for utilization of therapy services may be found in Medicare manuals, local coverage determinations of Medicare contractors, and professional guidelines issued by associations and states.

Bill the most relevant diagnosis. As always, when billing for therapy services, the ICD-9 code that best relates to the reason for the treatment shall be on the claim, unless there is a compelling reason. For example, when a patient with diabetes is being treated for gait training due to amputation, the preferred diagnosis is abnormality of gait (which characterizes the treatment). Where it is possible in accordance with State and local laws and the contractors local coverage determinations, avoid using vague or general diagnoses. When a claim includes several types of services, or where the physician/NPP must supply the diagnosis, it may not be possible to use the most relevant therapy code in the primary position. In that case, the relevant code should, if possible, be on the claim in another position.

Codes representing the medical condition that caused the treatment are used when there is no code representing the treatment. Complicating conditions are preferably used in non-primary positions on the claim and are billed in the primary position only in the rare circumstance that there is no more relevant code.

The condition or complexity that caused treatment to exceed caps must be related to the therapy goals and must either be the condition that is being treated or a complexity that directly and significantly impacts the rate of recovery of the condition being treated such that it is appropriate to exceed the caps. Codes marked as complexities represented by ICD-9 codes on the list below are unlikely to require therapy services that would exceed the caps unless they occur in a patient who also has another condition (either listed or not listed). Therefore, documentation for an exception should indicate how the complexity (or combination of complexities) directly and significantly affects treatment for a therapy condition. For example, if the condition underlying the reason for therapy is V43.64, hip replacement, the treatment may have a goal to ambulate 60' with stand-by assistance and a KX modifier may be appropriate for gait training (assuming the severity of the patient is such that the services exceed the cap). Alternatively, it would not be appropriate to use the KX modifier for a patient who recovered from hip replacement last year and is being treated this year for a sprain of a severity which does not justify extensive therapy exceeding caps.

3. ICD-9 Codes That are *More* Likely to Qualify for the Automatic Process Therapy Cap Exception Based Upon Clinical Condition or Complexity

When using this table, refer to the ICD-9 code book for coding instructions. Some contractors' local coverage determinations do not allow the use of some of the codes on this list in the primary diagnosis position on a claim. If the contractor has determined

that these codes do not characterize patients who require medically necessary services, providers/suppliers may not use these codes, but must utilize a billable diagnosis code allowed by their contractor to describe the patient's condition. Contractors shall not apply therapy caps to services based on the patient's condition, but only on the medical necessity of the service for the condition. If a service would be payable before the cap is reached and is still medically necessary after the cap is reached, that service is excepted. *This list is illustrative and not exclusive.* Providers/suppliers may use the automatic process for exception for medically necessary services when the patient has a billable condition that is not on the list below. The diagnosis on the list below may be put in a secondary position on the claim and/or in the medical records, as the contractor directs.

When two codes are listed in the left cell in a row, all the codes between them are also eligible for exception. If one code is in the cell, only that one code is likely to qualify for exception. The descriptions in the table are not always identical to those in the ICD-9 code book, but may be summaries. Contact your contractor for interpretation if you are not sure that a condition or complexity is applicable for automatic process exception.

It is very important to recognize that most of the conditions on this list would not ordinarily result in services exceeding the cap. Use the KX modifier only in cases where the condition of the individual patient is such that services are APPROPRIATELY provided in an episode that exceeds the cap. In most cases, the severity of the condition, comorbidities, or complexities will contribute to the necessity of services exceeding the cap, and these should be documented. Routine use of the KX modifier for all patients with these conditions will likely show up on data analysis as aberrant and invite inquiry. Be sure that documentation is sufficiently detailed to support the use of the modifier.

The following ICD-9 codes describe the conditions (etiology or underlying medical conditions) that may result in excepted conditions (marked X) and complexities (marked *) that MIGHT cause medically necessary therapy services to qualify for the automatic process exception for each discipline separately. When the field corresponding to the therapy discipline treating and the diagnosis code is marked with a dash (–) services by that discipline are not appropriate for that diagnosis and, therefore, services do not qualify for exception to caps.

These codes are grouped only to facilitate reference to them. The codes may be used only when the code is applicable to the condition being actively treated. For example, an exception should not be claimed for a diagnosis of hip replacement when the service provided is for an unrelated dysphagia.

4. Additional Considerations for Exceptions

In justifying exceptions for therapy caps, clinicians and contractors should not only consider the medical diagnoses and medical complications that might directly and significantly influence the amount of treatment required. Other variables (such as the availability of a caregiver at home) that affect appropriate treatment shall also be considered. Factors that influence the need for treatment should be supportable by published research, clinical guidelines from professional sources, and/or clinical/common sense. See Pub. 100-02, chapter 15, section 230.3 subsections related to documentation of the evaluation, and section 220.2 *on* medical necessity for some factors that complicate treatment.

Note that the patient's lack of access to outpatient hospital therapy services alone does not justify excepted services. Residents of skilled nursing facilities prevented by consolidated billing from accessing hospital services, debilitated patients for whom

transportation to the hospital is a physical hardship or lack of therapy services at hospitals in the beneficiary's county may or may not qualify for continued services above the caps. The patient's condition and complexities might justify extended services, but their location does not.

5. Appeals Related to Disapproval of Cap Exceptions

Disapproval of Exception from Caps. The DRA allows that certain services that would not be covered due to caps, but are medically necessary, may be covered. Therefore, when a service beyond the cap is determined to be medically necessary, it is covered and payable. But, when a service provided beyond the cap (outside the benefit) is determined to be NOT medically necessary, it is denied as a benefit category denial. Contractors may review claims with KX modifiers to determine whether the services are medically necessary, or for other reasons. Services that exceed therapy caps but do not meet Medicare criteria for medically necessary services are not payable even when clinicians recommend and furnish and these services.

Services without a Medicare benefit may be billed to Medicare with a GY modifier for the purpose of obtaining a denial that can be used with other insurers. See CMS IOM Pub. 100-04 Chapter 1, Section 60 for appropriate use of modifiers.

APPEALS –If a beneficiary whose excepted services do not meet the Medicare criteria for medical necessity elects to receive such services and a claim is submitted for such services, the resulting determination would be subject to the administrative appeals process. Further details concerning appeals are found in CMS IOM Pub. 100-04, chapter 29.

6. Use of the KX Modifier for Therapy Cap Exceptions

When exceptions are in effect and when the beneficiary qualifies for a therapy cap exception, the provider shall add a KX modifier to the therapy HCPCS subject to the cap limits. The KX modifier shall not be added to any line of service that is not a medically necessary service; this applies to services that, according to a Local Coverage Determination by the contractor, are not medically necessary services.

The codes subject to the therapy cap tracking requirements are listed in a table in the Claims Processing Manual, Pub. 100-04, chapter 5, section 20(B), "Applicable Outpatient Rehabilitation HCPCS Codes."

The GN, GO, or GP therapy modifiers are currently required. In addition to the KX modifier, the GN, GP and GO modifiers shall continue to be used. Providers may report the modifiers on claims in any order. If there is insufficient room on a claim line for multiple modifiers, additional modifiers may be reported in the remarks field. Follow the routine procedure for placing HCPCS modifiers on a claim as described below.

- For professional claims, sent to the carrier, refer to:

- Pub.100-04 Medicare Claims Processing Manual, Chapter 26, for more detail regarding completing the CMS- Form 1500 claim form, including the placement of HCPCS modifiers. Note that the CMS-Form1500 claim form currently has space for providing two modifiers in block 24D, but, if you have more than two to report, you can do so by placing the -99 modifier (which indicates multiple modifiers) in block 24D and placing the additional modifiers in block 19.

You may access the Medicare Claims Processing Manual at this web address <http://www.cms.hhs.gov/Manuals/>

From this site, click the links to Internet-Only Manuals (IOMs), then Pub. 100-04 to reach the Medicare Claims Processing Manual.

- The ASC X12N 837 Health Care Claim: Professional Implementation Guide, Version 4010A1, for more detail regarding how to electronically submit a health care claim transaction, including the placement of HCPCS modifiers. The ASC X12N 837 implementation guides are the standards adopted under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) for submitting health care claims electronically. The 837 professional transaction currently permits the placement of up to four modifiers, in the 2400 loop, SV1 segment, data elements SV101-3, SV101-4, SV101-5, and SV101-6. You may obtain copies of the ASC X12N 837 implementation guides from the Washington Publishing Company.

- For claims paid to carriers, it is only appropriate to use a KX for a service that reasonably may exceed the cap. Use of the KX modifier when there is no indication that the cap is likely to be exceeded is abusive. For example, use of the KX modifier for low cost services early in an episode when there is no evidence of a previous episode that might have exceeded the cap is inappropriate.

- For institutional claims, sent to the FI:
 - When the cap is exceeded by at least one line on the claim, use the KX modifier on all of the lines on that institutional claim that refer to the same therapy cap (PT/SLP or, OT,) regardless of whether the other services exceed the cap. For example, if one PT service line exceeds the cap, use the KX on all the PT and SLP service lines (also identified with the GP or GN modifier) for that claim. (When the PT/SLP cap is exceeded by PT services, the SLP lines on the claim may meet the requirements for an exception due to the complexity of two episodes of service. Use the KX on either all or none of the SLP lines on the claim, as appropriate.) In contrast, if all the OT lines on the claim are below the cap, do not use the KX modifier on any of the OT lines, even when the KX is appropriately used on all of the PT lines.

- Refer to Pub.100-04 Medicare Claims Processing Manual, chapter 25, for more detail regarding completing the CMS- Form 1450 claim form, including the placement of HCPCS modifiers.

You may access the Medicare Claims Processing Manual at this web address <http://www.cms.hhs.gov/Manuals/>. From this site, click the links to Internet-Only Manuals (IOMs), then Pub. 100-04 to reach the Medicare Claims Processing Manual.

- By attaching the KX modifier, the provider is attesting that the services billed:
 - Are reasonable and necessary services that require the skills of a therapist; (See CMS Pub. 100-02, chapter 15, section 220.2 B); and
 - Are justified by appropriate documentation in the medical record, (See CMS Pub. 100-02, chapter 15, section 220.3); and
 - Qualify for an exception using the automatic process exception.

If this attestation is determined to be inaccurate, the provider/supplier is subject to sanctions resulting from providing inaccurate information on a claim.

- When the KX modifier is attached to a therapy HCPCS, the contractor will override the CWF system reject for services that exceed the caps and pay the claim if it is otherwise payable.
- Providers and suppliers shall continue to attach correct coding initiative (CCI) HCPCS modifiers under current instructions.
- If a claim is submitted without KX modifiers and the cap is exceeded, those services will be denied. In cases where the KX would have been appropriate, contractors may reopen and/or adjust the claim, if it is brought to their attention.
- Services billed after the cap has been exceeded which are not eligible for exceptions may be billed for the purpose of obtaining a denial using condition code 21.

D. MSN Messages

Existing MSN message 38.18 shall continue to appear on all Medicare MSN forms. It has been updated to the following:

- **ALERT:** Coverage by Medicare is limited to \$1,810 in 2008 *and \$1840 for 2009* for outpatient physical therapy and speech-language pathology combined. Occupational therapy services have the same limits. Medicare pays up to 80 percent of the limits after the deductible has been met. Exceptions to these limits apply to therapy billed by hospital outpatient departments and may also apply to medically necessary services.

- Spanish Translation: ALERTA: La cobertura de Medicare se limita a \$1,810 en el 2008 y a \$1,840 en el 2009 para los servicios combinados de terapia física ambulatoria y terapia de patología del habla. Los servicios de terapia ocupacional tienen los mismos límites. Medicare paga hasta 80 por ciento de los límites después de que se haya pagado el deducible. Estos límites no se aplican a terapia que usted obtenga en los departamentos de hospital para paciente ambulatorio, y pueden también aplicarse a los servicios médicamente necesarios.

Existing MSN messages 17.13, 17.18 and 17.19 shall be issued on all claims containing outpatient rehabilitation services as noted in this manual. Add applied amount for individual beneficiaries and the generic limit amount (e.g., \$1740 in 2006, \$1780 in 2007, \$1810 in 2008, *and \$1840 in 2009*) to all MSN that require them.

- 17.13 - Medicare approves a limited dollar amount each year for physical therapy and speech-language pathology services and a separate limit each year for occupational therapy services when billed by providers, physical and occupational therapists, physicians, and other non-physician practitioners. Medically necessary therapy over these limits is covered when received at a hospital outpatient department or when approved by Medicare.

Spanish Translation

17.13 Cada año, Medicare aprueba una cantidad límite por servicios de terapia física y patología del lenguaje. Anualmente también aprueba otra cantidad límite por servicios de terapia ocupacional cuando son facturados por proveedores, terapeutas físicos y ocupacionales, médicos y otros practicantes no médicos. La terapia que es médicamente necesaria y que sobrepasa estas cantidades límites está cubierta cuando se recibe en una unidad de hospital ambulatorio o cuando está aprobada por Medicare.

- 17.18 - (\$) has been applied during this calendar year (CCYY) towards the (\$) limit on outpatient physical therapy and speech-language pathology benefits.

Spanish Translation

17.18 - En este año (CCYY), (\$) han sido deducidos de la cantidad límite de (\$) por los beneficios de terapia física ambulatoria y de patología del lenguaje hablado.

- 17.19 (\$) has been applied during this calendar year (CCYY) towards the (\$) limit on outpatient occupational therapy benefits.

Spanish Translation

17.19 - En este año (CCYY), (\$) han sido deducidos de la cantidad límite de (\$) por los beneficios de terapia ocupacional ambulatoria.

Carriers and intermediaries shall use the existing Medicare Summary Notice message 17.6 to inform the beneficiaries that they have reached the financial limitation. Apply this message at the line level:

- 17.6 - Full payment was not made for this service because the yearly limit has been met.

Spanish Translation

17.6 - Debido a que usted alcanzó su límite anual por este servicio, no se hará un pago completo.

E. FI Requirements

1. General Requirements

Regardless of financial limits on therapy services, CMS requires modifiers (See Sec. 20.1 of this chapter) on specific codes for the purpose of data analysis. Edit to ensure that the therapy modifiers are present on a claim based on the presence of revenue codes 042X, 043X, or 044X. Claims containing revenue codes 042X, 043X, or 044X without a therapy modifier GN, GP, or GO should be returned to the provider.

Beneficiaries may not be simultaneously covered by Medicare as an outpatient of a hospital and as a patient in another facility. They must be discharged from the other setting and registered as a hospital outpatient in order to receive payment for outpatient rehabilitation services in a hospital outpatient setting after the limitation has been reached.

A hospital may bill for services of a facility as hospital outpatient services if that facility meets the requirements of a department of the provider (hospital) under 42 CFR 413.65. Facilities that do not meet those requirements are not considered to be part of the hospital and may not bill under the hospital's provider number, even if they are owned by the hospital. For example, services of a Comprehensive Outpatient Rehabilitation Facility (CORF) must be billed as CORF services and not a hospital outpatient services, even if the CORF is owned by the hospital. Only services billed by the hospital as bill type 12X or 13X are exempt from limitations on therapy services.

2. When Financial Limits Are in Effect

The CWF applies the financial limitation to the following bill types 22X, 23X, 34X, 74X and 75X using the MPFS allowed amount (before adjustment for beneficiary liability).

For SNFs, the financial limitation does apply to rehabilitation services furnished to those SNF residents in noncovered stays (bill type 22X) who are in a Medicare-certified section of the facility—i.e., one that is either certified by Medicare alone, or is dually certified

(by Medicare as a SNF and by Medicaid as a nursing facility (NF). For SNF residents, consolidated billing requires all outpatient rehabilitation services be billed to Part B by the SNF. If a resident has reached the financial limitation, and remains in the Medicare-certified section of the SNF, no further payment will be made to the SNF or any other entity. Therefore, SNF residents who are subject to consolidated billing may not obtain services from an outpatient hospital after the cap has been exceeded.

Once the financial limitation has been reached, SNF residents who are in a non-Medicare certified section of the facility—i.e., one that is certified only by Medicaid as a NF or that is not certified at all by either program—FIs use bill type 23X. For SNF residents in non-Medicare certified portions of the facility and SNF nonresidents who go to the SNF for outpatient treatment (bill type 23X), medically necessary outpatient therapy may be covered at an outpatient hospital facility after the financial limitation has been exceeded.

Limitations do not apply for SNF residents in a covered Part A stay, including swing beds. Rehabilitation services are included within the global Part A per diem payment that the SNF receives under the PPS for the covered stay. Also, limitations do not apply to any therapy services billed under PPS Home Health, or inpatient hospitals including critical access hospitals.

F. Carrier Requirements when Financial Limits are in Effect

Claims containing any of the “Applicable Outpatient Rehabilitation HCPCS Codes” in section 20 below marked “always therapy” (underlined) codes should contain one of the therapy modifiers (GN, GO, GP). All claims submitted for codes underlined but without a therapy modifier shall be returned as unprocessable.

When any code on the list of “Applicable Outpatient Rehabilitation HCPCS Codes” codes are submitted with specialty codes “65” (physical therapist in private practice), and “67” (occupational therapist in private practice), they always represent therapy services, because they are provided by therapists. Carriers shall return claims for these services when they do not contain therapy modifiers for the applicable HCPCS codes.

The “Applicable Outpatient Rehabilitation HCPCS Codes in section 20 of this chapter that are marked (+) are sometimes therapy codes. Claims from physicians (all specialty codes) and nonphysician practitioners, including specialty codes “50,” “89,” and “97” may be processed without therapy modifiers. On review of these claims, services that are not accompanied by a therapy modifier must be documented, reasonable and necessary, and payable as physician or nonphysician practitioner services, and not services that the contractor interprets as therapy services.

The CWF will capture the amount and apply it to the limitation whenever a service is billed using the GN, GO, or GP modifier.

G. FI Action Based on CWF Trailer During the Time Therapy Limits are in Effect

Upon receipt of the CWF error code/trailer, FIs are responsible for assuring that payment does not exceed the financial limitations, when the limits are in effect, except as noted below.

In cases where a claim line partially exceeds the limit, the FI must adjust the line based on information contained in the CWF trailer. For example, where the MPFS allowed amount is greater than the financial limitation available, always report the MPFS allowed amount in the "Financial Limitation" field of the CWF record and include the CWF override code. See example below for situations where the claim contains multiple lines that exceed the limit.

EXAMPLE: Based on the 2009 limit of \$1840 for a beneficiary who has paid the deductible and the coinsurance:

Services received to date \$1825 (\$15 under the limit)
Incoming claim: Line 1 MPFS allowed amount is \$50.
 Line 2 MPFS allowed amount is \$25.
 Line 3, MPFS allowed amount is \$30.

Based on this example, lines 1 and 3 are denied and line 2 is paid. The FI reports in the "Financial Limitation" field of the CWF record "\$25.00 along with the CWF override code. The FI always applies the amount that would least exceed the limit. Since the FI systems cannot split the payment on a line, CWF will allow payment on the line that least exceeds the limit and deny other lines.

H. Additional Information for Carriers and FIs During the Time Financial Limits Are in Effect With or Without Exceptions

Once the limit is reached, if a claim is submitted, CWF returns an error code stating the financial limitation has been met. Over applied lines will be identified at the line level. The outpatient rehabilitation therapy services that exceed the limit should be denied. The FIs and carriers use group code PR and claim adjustment reason code 119 - Benefit maximum for this time period or occurrence has been reached- in the provider remittance advice to establish the reason for denial.

In situations where a beneficiary is close to reaching the financial limitation and a particular claim might exceed the limitation, the provider/supplier should bill the usual and customary charges for the services furnished even though such charges might exceed the limit. The CWF will return an error code/trailer that will identify the line that exceeds the limitation.

Because CWF applies the financial limitation according to the date when the claim was received (when the date of service is within the effective date range for the limitation), it is possible that the financial limitation will have been met before the date of service of a given claim. Such claims will prompt the CWF error code and subsequent contractor denial.

When the provider/supplier knows that the limit has been reached, further billing should not occur. The provider/supplier should inform the beneficiary of the limit and their option of receiving further covered services from an outpatient hospital (unless consolidated billing rules prevent the use of the outpatient hospital setting). If the beneficiary chooses to continue treatment at a setting other than the outpatient hospital where medically necessary services may be covered, the services may be billed at the rate the provider/supplier determines. Services provided in a capped setting after the limitation has been reached are not Medicare benefits and are not governed by Medicare policies.

If a beneficiary elects to receive services that exceed the cap limitation and a claim is submitted for such services, the resulting determination is subject to the administrative appeals process as described in subsection C.6 of this section and Pub. 100-04, chapter 29.

I. Provider Notification for Beneficiaries Exceeding Therapy Limits

Contractors will advise providers/suppliers to notify beneficiaries of the therapy financial limitations at their first therapy encounter with the beneficiary. Providers/suppliers should inform beneficiaries that beneficiaries are responsible for 100 percent of the costs of therapy services above each respective therapy limit, unless this outpatient care is furnished directly or under arrangements by a hospital. Patients who are residents in a Medicare certified part of a SNF may not utilize outpatient hospital services for therapy services over the financial limits, because consolidated billing rules require all services to be billed by the SNF. However, when therapy cap exceptions apply, SNF residents may qualify for exceptions that allow billing within the consolidated billing rules.

It is the provider's responsibility to present each beneficiary with accurate information about the therapy limits, and that, where necessary, appropriate care above the limits can be obtained at a hospital outpatient therapy department. Medicare contractors shall advise providers/suppliers to use a form of their own design to inform beneficiaries of the therapy financial limitation and the cap exclusion process.

The Notice of Exclusion from Medicare Benefits (NEMB Form No. CMS 20007) may be used to inform a beneficiary of financial liability for therapy above the cap where no exception applies. When using the NEMB form, the *beneficiary checks the appropriate box and the provider* writes the reason for denial in the space provided at the top of the form. The following reason is suggested: "Services do not qualify for exception to therapy caps. Medicare will not pay for physical therapy and speech-language pathology services over (add the dollar amount of the cap and the year or the dates of service to which it applies, e.g., \$1810 in 2008) unless the beneficiary qualifies for a cap exception." Providers are to supply this same information for occupational therapy services over the limit for the same time period, as appropriate.

The NEMB form can be found at: <http://www.cms.hhs.gov/medicare/bni/>

***NOTE:** The NEMB form will be discontinued beginning March 1, 2009. Beginning on this date, providers may use the revised ABN (CMS-R-131) in place of the NEMB or a similar form of their own design.*

ABN An Advance Beneficiary Notice (ABN) is required to be given to a beneficiary whenever the treating clinician determines that the services being provided are no longer expected to be covered because they do not satisfy Medicare's medical necessity requirements. The ABN informs the beneficiary of their potential financial obligation to the provider and provides guidance regarding appeal rights. *The* ABN applies to services that are provided **BEFORE** the cap is exceeded.

***NOTE:** The ABN-G will no longer be effective beginning March 1, 2009. Beginning on this date, providers must use the revised ABN (CMS-R-131).*

The revised ABN can be found at:

<http://www.cms.hhs.gov/BNI/Downloads/ABNFormInstructions.zip>

After the cap is exceeded, *only voluntary notice, such as* the NEMB *or the revised ABN (beginning 3/1/09)* is appropriate, regardless of whether the services were excepted from the cap. For example, if services are provided over the cap for an excepted condition, when the therapist determines that the services no longer meet the criteria for reasonable and necessary services, *a voluntary notice, such as the NEMB or the revised ABN* may be provided to the patient.

At the time the clinician determines that skilled services are not necessary, the clinical goals have been met, or that there is no longer potential for the rehabilitation of health and/or function in a reasonable time, the beneficiary should be informed. If the beneficiary requests further services, inform the beneficiary that Medicare will not likely provide additional coverage. Use the ABN form for this purpose if the services are within the cap, and use the NEMB/*revised ABN* for services after the cap is exceeded.

Access to Accrued Amount All providers and contractors may access the accrued amount of therapy services from the ELGA screen inquiries into CWF. Provider/suppliers may access remaining therapy services limitation dollar amount through the 270/271 eligibility inquiry and response transaction. Providers who bill to FIs will also find the amount a beneficiary has accrued toward the financial limitations on the HIQA. Some suppliers and providers billing to carriers may, in addition, have access the accrued amount of therapy services from the ELGB screen inquiries into CWF. Suppliers who do not have access to these inquiries may call the contractor to obtain the amount accrued.

20 - HCPCS Coding Requirement

(Rev. 1678; Issued: 02-13-09; Effective Date: 01-01-09; Implementation Date: 04-06-09)

A. Uniform Coding

Section [1834\(k\)\(5\)](#) of the Act requires that all claims for outpatient rehabilitation therapy services and all comprehensive outpatient rehabilitation facility (CORF) services be reported using a uniform coding system. The current Healthcare Common Procedure Coding System/Current Procedural Terminology is used for the reporting of these services. The uniform coding requirement in the Act is specific to payment for all CORF services and outpatient rehabilitation therapy services - including physical therapy, occupational therapy, and speech-language pathology - that is provided and billed to carriers and fiscal intermediaries (FIs). The Medicare physician fee schedule (MPFS) is used to make payment for these therapy services at the nonfacility rate.

Effective for claims submitted on or after April 1, 1998, providers that had not previously reported HCPCS/CPT for outpatient rehabilitation and CORF services began using HCPCS to report these services. This requirement does not apply to outpatient rehabilitation services provided by:

- Critical access hospitals, which are paid on a cost basis, not MPFS;
- RHCs, and FQHCs for which therapy is included in the all-inclusive rate; or
- Providers that do not furnish therapy services.

The following “providers of services” must bill the FI for outpatient rehabilitation services using HCPCS codes:

- Hospitals (to outpatients and inpatients who are not in a covered Part A¹ stay);
- Skilled nursing facilities (SNFs) (to residents not in a covered Part A¹ stay and to nonresidents who receive outpatient rehabilitation services from the SNF);
- Home health agencies (HHAs) (to individuals who are not homebound or otherwise are not receiving services under a home health plan of care² (POC));
- Comprehensive outpatient rehabilitation facilities (CORFs); and
- Providers of outpatient physical therapy and speech-language pathology services (OPTs), also known as rehabilitation agencies (previously termed outpatient physical therapy facilities in this instruction).

Note 1. The requirements for hospitals and SNFs apply to inpatient Part B and outpatient services only. Inpatient Part A services are bundled into the respective prospective payment system payment; no separate payment is made.

Note 2. For HHAs, HCPCS/CPT coding for outpatient rehabilitation services is required only when the HHA provides such service to individuals that are not homebound and, therefore, not under a home health plan of care.

The following practitioners must bill the carriers for outpatient rehabilitation therapy services using HCPCS/CPT codes:

- Physical therapists in private practice (PTPPs),
- Occupational therapists in private practice (OTPPs),
- Physicians, including MDs, DOs, podiatrists and optometrists, and
- Certain nonphysician practitioners (NPPs), acting within their State scope of practice, e.g., nurse practitioners and clinical nurse specialists.

Providers billing to intermediaries shall report:

- The date the therapy plan of care was either established or last reviewed (see §220.1.3B) in Occurrence Code 17, 29, or 30.
- The first day of treatment in Occurrence Code 35, 44, or 45.

B. Applicable Outpatient Rehabilitation HCPCS Codes

The CMS identifies the following codes as therapy services, regardless of the presence of a financial limitation. Therapy services include only physical therapy, occupational therapy and speech-language pathology services. Therapist means only a physical therapist, occupational therapist or speech-language pathologist. Therapy modifiers are GP for physical therapy, GO for occupational therapy, and GN for speech-language pathology. Check the notes below the chart for details about each code.

When in effect, any financial limitation will also apply to services represented by the following codes, except as noted below.

NOTE: Listing of the following codes does not imply that services are covered or applicable to all provider settings.

64550+	90901+	<u>92506Δ</u>	<u>92507Δ</u>	<u>92508</u>	<u>92526</u>

This table was updated to delete 0029T on January 1, 2009.

* The physician fee schedule abstract file does not contain a price for CPT codes 97039, 97139, or 97799, since the carrier prices them. Therefore, the FI must contact the carrier to obtain the appropriate fee schedule amount in order to make proper payment for these codes.

◇ Effective January 1, 2006, these codes will no longer be valued under the MPFS. They will be priced by the carriers.

△ Effective January 1, 2006, the code descriptors for these services have been changed.

** CPT code 97760 should not be reported with CPT code 97116 for the same extremity.

*** The physician fee schedule abstract file does not contain a price for CPT codes 0019T, 0029T, and 0183T since they are priced by the carrier. In addition, the carrier determines coverage for these codes. Therefore, the FI contacts the carrier to obtain the appropriate fee schedule amount.

**** These HCPCS/CPT codes are bundled under the MPFS. They are bundled with any therapy codes. Regardless of whether they are billed alone or in conjunction with another therapy code, never make payment separately for these codes. If billed alone, HCPCS/CPT codes marked as “****” shall be denied using the existing MSN language. For remittance advice notices, use group code CO and claim adjustment reason code 97 that says: “Payment is included in the allowance for another service/procedure.” Use reason code 97 to deny a procedure code that should have been bundled. Alternatively, reason code B15, which has the same intent, may also be used.

✓ If billed by an outpatient hospital department, these HCPCS codes are paid using the Outpatient Prospective Payment System (OPPS).

Underlined codes are “always therapy” services, regardless of who performs them. These codes always require therapy modifiers (GP, GO, GN).

If billed by a hospital subject to OPPS for an outpatient service, these HCPCS codes – also indicated as “sometimes therapy” services - will be paid under the OPPS when the service is not performed by a qualified therapist and it is inappropriate to bill the service under a therapy plan of care. The requirements for other “sometimes therapy” codes, described below, apply.

+ These HCPCS/CPT codes sometimes represent therapy services. However, these codes always represent therapy services and require the use of a therapy modifier when performed by therapists.

There are some circumstances when these codes will not be considered representative of therapy services and therapy limits (when they are in effect) will not apply. Codes marked + are not therapy services when:

- It is not appropriate to bill the service under a therapy plan of care, and
- They are billed by practitioners/providers of services who are not therapists, i.e., physicians, clinical nurse specialists, nurse practitioners and psychologists; or they are billed to fiscal intermediaries by hospitals for outpatient services which are performed by non-therapists as noted in Note “ ” above.

While the “+” designates that a particular HCPCS/CPT code will not of itself always indicate that a therapy service was rendered, these codes always represent therapy services when rendered by therapists or by practitioners who are not therapists in situations where the service provided is integral to an outpatient rehabilitation therapy plan of care. For these situations, these codes must always have a therapy modifier. For example, when the service is rendered by either a doctor of medicine or a nurse practitioner (acting within the scope of his or her license when performing such service), with the goal of rehabilitation, a modifier is required. When there is doubt about whether a service should be part of a therapy plan of care, the contractor shall make that determination.

“Outpatient rehabilitation therapy” refers to skilled therapy services, requiring the skills of qualified therapists, performed for restorative purposes and generally involving ongoing treatments as part of a therapy plan of care. In contrast, a non-therapy service is a service performed by non-therapist practitioners, without an appropriate rehabilitative plan or goals, e.g., application of a surface (transcutaneous) neurostimulator – CPT code 64550, and biofeedback training by any modality – CPT code 90901. When performed by therapists, these are “always” therapy services. Contractors have discretion to determine whether circumstances describe a therapy service or require a rehabilitation plan of care.

The underlined HCPCS codes on the above list do not have a + sign because they are considered “always therapy” codes and always require a therapy modifier. Therapy services, whether represented by “always therapy” codes, or + codes in the above list performed as outpatient rehabilitation therapy services, must follow all the policies for therapy services (e.g., Pub. 100-04, chapter 5; Pub. 100-02, chapters 12 and 15).

C. Additional HCPCS Codes

Some HCPCS/CPT codes that are not on the list of therapy services should not be billed with a modifier. For example, outpatient non-rehabilitation HCPCS codes G0237, G0238, and G0239 should be billed without therapy modifiers. These HCPCS codes describe services for the improvement of respiratory function and may represent either “incident to” services or respiratory therapy services that may be appropriately billed in the CORF setting. When the services described by these G-codes are provided by physical therapists (PTs) or occupational therapists (OTs) treating respiratory conditions, they are considered therapy services and must meet the other conditions for physical and occupational therapy. The PT or OT would use the appropriate HCPCS/CPT code(s) in the 97000 – 97799 series and the corresponding therapy modifier, GP or GO, must be used.

Another example of codes that are not on the list of therapy services and should not be billed with a therapy modifier includes the following HCPCS codes: 95860, 95861, 95863, 95864, 95867, 95869, 95870, 95900, 95903, 95904, and 95934. These services represent diagnostic services - not therapy services; they must be appropriately billed and shall not include therapy modifiers.

Other codes not on the above list, and not paid under another fee schedule, are appropriately billed with therapy modifiers when the services are furnished by therapists or provided under a therapy plan of care and where the services are covered and appropriately delivered (e.g., the therapist is qualified to provide the service). One example of non-listed codes where a therapy modifier is indicated, regards the provision of services described in the CPT code series, 29000 through 29590, for the application of casts and strapping. Some of these codes previously appeared on the above list, but were deleted because we determined that they represented services that are most often performed outside a therapy plan of care. However, when these services are provided by therapists or as an integral part of a therapy plan of care, the CPT code must be accompanied with the appropriate therapy modifier.

NOTE: The above lists of HCPCS/CPT codes are intended to facilitate the contractor’s ability to pay claims under the MPFS. It is not intended to be an exhaustive list of covered services, imply applicability to provider settings, and does not assure coverage of these services.
